

I am asking that you not vote on the proposal for de-regulation of the media industry on June 2. This issue needs to be made known to the public, and the public needs to be heard. I am against any further de-regulation. Allowing a monopoly of this industry is dangerous to our constitutional right to free press. We need healthy competition in all industries, but especially in that of the media. We recently experienced a censorship of a major movie from our CBS affiliate. Had all of our media been owned by this company, we would have missed this very informative, educational movie about the rise of Hitler. Please do NOT approve this proposal.
